2. \*\*Choose File > Browse to open the File Browser to locate the image you want to work on.\*\* A thumbnail image is displayed with the name of the image. 3. \*\*Choose File > Open\*\*. When the Open dialog box appears, as shown in Figure 17-1, the navigation window (on the left side) provides a thumbnail view of the images stored on your computer. At the bottom of the navigation window are the following:

- \* A small thumbnail image is used to identify the image. You can see that in Figure 17-1.
- \* A white background shows which thumbnail image contains the image you want to work on. (Depending on your monitor, the image may not be white.)
- \* Click the image to display the full-size image on your screen. FIGURE 17-1: The File Browser's navigation window lists files on your computer. If you don't see an image from your computer in the navigation window, you may need to resize it in the navigation window. In the File Browser, select View > Navigate Frame Size to specify that you want the navigation window to display a view with more width or height. (Hint: Views can be resized by dragging the edges of the window.) You can also scroll through your computer's files using the navigation window by clicking the up and down scroll arrows at the bottom of the navigation window. If you're using a touch screen, you can swipe up or down to scoot through the thumbnail images.
- \* The navigation window provides a convenient way to find a specific file. Click any image's thumbnail to display a preview of that image in the File Browser. You can choose which thumbnail image you want to see by clicking its thumbnail at the far left of the navigation window. Click an image's thumbnail again to dismiss the preview. Here's a trick: You can open an image directly from the navigation window by right-clicking the image thumbnail and then choosing Open. In this case, the full-size image appears. The File Browser usually opens in landscape format (height is longer than width). To change the orientation of the navigation window to portrait format, click the rotation lock (a circle with a line through it, in the navigation window's bottom-right corner), as shown in Figure 17-2. In this article, we will be covering the most commonly used features in the software. We will also briefly introduce the less used features that are still very useful. This article is for the beginning to intermediate users and those who already know Photoshop.

- Edit Photos** In order to take an image from a camera or other source and make it look more professional, you will need to edit the image or use a filter. There are a number of ways to edit photos:
  - Adjust colors:** Increase the saturation or decrease it to make the images more vivid and with more contrast.
  - Add a filter:** The best photo editing software has a lot of filters that will transform an image within seconds.
  - Improve focus:** The main reason for using software in photography is to improve focus, especially on portraits. You need to sharpen or blur areas of the photo to achieve this result.
- Modify Images** In addition to editing images, Photoshop allows us to create new images using editing techniques and design elements. Since Photoshop is often used as a graphic designer tool, images that include backgrounds, watermarks, logos or any other design element can be created easily.
- Add Effects** Photoshop Elements is a powerful program that includes advanced features. It can make your photos look better by adding effects. Some of these effects can be free. You can create unique effects quickly and easily. Some of the effects we can create are:
  - Flashlight:** Find photos or videos in the dark
  - Fire:** Create the effect of a fire on a dark background
  - Fog:** Create a mist effect in the background.
  - Comets:** Make a comet fly across the sky
  - Bloom:** Soft light with a blurred background
  - Star trail:** The stars show the movement of the camera shutter.
- Add Text** Photoshop Elements allows us to add text. This is a very useful technique as it can be used to create professional flyers or banners or promote a product. Photoshop Elements is perfect for adding text to the images.
- Add Frames** People like frames because it helps to make the picture look more professional and more memorable. But applying a frame to a photo can be a difficult task. For this reason, there are programs that allow us to create frames easily.
- Add Embedding** You can use Photoshop to create memes and share them

Q: How to change the title of the toolbar in Sharepoint Foundation? I'm working on Sharepoint Foundation. I want to change the title of the toolbar from Enterprise Information Management to something else. I know that it is not possible to change it in the environment. But I want to know the way to change this in an out of the box Sharepoint farm. Do you have any ideas about this? A: You can create your own custom masterpage and then set the HeaderTitle property. However that might affect your end users if you have unique branding for your farm. Add the following to your web.config for the sitecollection YourTitle The 'paradox of choice': understanding a decision-making behaviour that is deterministically self-defeating. Choice is both a necessary and a sufficient condition for successful navigation of the world of the social and the economic. Choosing, however, can be a remarkably paradoxical activity. It can generate uncertainty about the choice made, it can bias decision-making and it can be self-defeating. This behaviour has been shown to be related to how personally involved and emotionally involved people are in their choice decision. The consequences of making self-defeating choices have been shown to affect a range of important personal, social and economic outcomes. In this paper, we posit that when people try and make decisions, they act to reduce uncertainty and uncertainty is a key source of personal motivation. If choice is to become more effective, it must be framed as a self-defeating activity because uncertainty is a powerful source of personal motivation and it will therefore naturally reduce the effectiveness of decision-making. We also propose that the self-defeating behaviour people exhibit when making decisions is a predictable consequence of the complexity of the decisions they make. This self-defeating behaviour will be seen as a by-product of the high order nervous system of the decision-maker and it is the function of the mind to find rules, make working hypotheses, calculate the probability of errors and so make decisions that are self-defeating. Mutation analysis of the androgen receptor (AR) gene in young patients with sporadic spinal cord tumors: identification of a novel T826A missense mutation. The incidence of spinal cord tumors in young men is 0.4%. Among the various histologic subtypes of spinal cord tumors in young men, chordomas occur most frequently. The genetic changes underlying the development of chordoma are poorly understood. The androgen receptor (AR) gene is known to play a critical role in embryonal organogenesis and is considered to be associated with the development of chordoma, an undifferentiated spindle cell neoplasm with a propensity to locally invade surrounding tissues. To study the role of the AR gene in the development of sporadic spinal cord tumors in young men, we performed mutation analysis of the AR gene using single-strand conformation polymorphism analysis. We detected 4 novel and 10 known mutations in 24 patients; all mutations were found in sporadic nonchordomatous sarcomas. Furthermore, we identified a novel T826A mutation that resulted in a phenylalanine-to-tyrosine substitution at residue 826. This mutation was found exclusively in an unrelated young male patient who had an epidural spinal cord tumor, suggesting a genetic heterogeneity of various spinal cord tumors in young men. These results suggest that certain AR mutations may be associated with the development of the spinal cord tumors in young men. Next time you purchase an item that has a date on it, don't forget to check the "Dated" section of the instructions. Most of the time, you'll find another time range that could apply to your item. If you're unsure if you're using the right lotion, check out the Cosmofix Lotion Test, found in the "Products for Health" section of the instructions. If you're looking for something specific, check the "Suggested Use" section of the instructions. The community will definitely help you! Check your labels!
